Being extreme size is it difficult to cope up with different size charts of different brands?

(my mind map
Based upon
extreme shapes
and sizes where
I understood
silhouettes plus
size, extra small
, LGBTQ etc)

Break down your inquiry question into 3 smaller question

Each country having its size chart

2. Contour clothing and issues faced by extreme sizes?

3. Transgender fitting issues faced by them ?

Establish 3 key idea that address the specific sub-question

1. b India to have its own chart

1. c Common parameter of fitting

2. a
Plus size

2. b
Teenager

2. c Extreme small sizes

3. a Transwomen having issues with bottoms

3. b Transmen having problem with upper portion clothing?

3. c Is right to wear serving this market?

Conclusion:

Establishing a size chart with wider parameter is the first step .Next acceptance and the need is to be catered in the right way .
